ORGANIZATION PROFILE

LDA Balkan is a non-profit non-governmental organization run by young professionals, focused on leadership, democracy, good governance, entrepreneurship, technology & innovation, professional growth, and many management areas. We work towards empowering citizenship education and creating an equal society in Balkan.

Our vision is to help young people realize their potential and become inclusive and empathetic leaders in their community. The new generation has the potential to solve the most complex problems of our society. We strive to inspire global youth to engage constructively and enhance their professional and personal skills through collaborative partnerships, international educational and cultural exchanges, training and volunteering.

Our mission is to serve as an international platform to activate and foster youth potential, empowering their personal and professional skills through volunteering, engagement and interaction in an international environment.

Leadership

Our board of directors consists of one President, one Vice- President, one Administrator, and 10 (ten) member representatives by 2(two) from each country.

Our core values are the pillars of all that we do:

- **Integrity:** We are committed to honesty, accountability, and transparency in all our endeavors. We are accountable to the people and partners we humbly serve, transparently sharing our results, stories and lessons.
- **Inclusiveness:** We work with others regardless of race, gender, age, creed or nationality, color, political affiliation, gender or belief. We know that by embracing differences, actively including a variety of voices, and joining we can solve the world's most complex problems.
- **Professionalism and teamwork:** LDA values effective teamwork and collaboration when delivering professional services. We strive to attain the highest standards in all that we do, and we are committed to participatory decision making.
- **Excellence:** We challenge ourselves to the highest level of learning and performance, tapping the best of the human spirit to create impact.
- **Innovativeness and creativity:** Pursuing innovative and effective solutions, creative ideas, and ongoing improvement. Innovation is a key driver for our growth. We believe insurgent action on innovation, and the necessity of transformation—within the world and our own organization.
- **Equality:** We believe in the equal value of every human being and the importance of respecting and honoring everyone; we know that change happens through people.
